DIRT BIKE LOADING SYSTEM

PART #	DESCRIPTION
REV5000	SMART STEP MOTORCYCLE LOADING SYSTEM

The easiest and safest way to load a dirt bike is to use the RevArc Smart Steps with the RevArc MX Ramp; we call it the RevArc Dirt Bike Loading System. The steps and ramp self-adjust to the height of your tailgate. Stop straining your back. Stop balancing your bike with one hand while you crawl like a reptile onto the tailgate. Stop riding with your annoying cousin just because he helps you load. Simply push your bike up the ramp while you walk up four sturdy steps. You're done.

Two components:

RevArc MX Ramp

- ◇ 16 lbs of TIG Welded Aluminum
- ◇ Works with all factory dirt bike under 500lbs
- ◇ 96.5" L x 12" W, folds to only 49" L for easy storage
- ◇ Length + Arch = Less Work to Load

RevArc Smart Steps

- ◇ 31 lbs of Powder-Coated Steel
- ◇ 4 Large Steps are 10" L x 6" W, weight capacity up to 300lbs
- ◇ Mounts in receiver hitch and folds for transportation with tailgate up or down
- ◇ Perfect for lifted trucks, or smart riders who'd rather take risks on the trail than the parking lot

PRO TAPER BAR CLAMP

PART #	DESCRIPTION
ALP01-1511A	PRO TAPER BAR CLAMP

The universal solid mount kit gives you the option to run 1-1/8" handlebars without replacing your complete top triple clamp. Bolts right in to your existing 7/8" solid bar mounts for an easy, cost efficient way to upgrade to oversized bars.
