RAIL ICE SCRATCHER KITS

PART #	DESCRIPTION
OTT1000	RAIL MOUNT ICE SCRATCHERS

◊ These ice scratchers prevent hifax wear and overheating when riding on ice or hard-packed snow.

- ◊ They are spring loaded scratchers drag in the snow creating a spray of ice chips into the skid frame, lubricating your hifax.
- ◊ They typically lower coolant temperatures up to 30° F on hard-packed snow.
- ◊ Sold in kit form, they are easy to install and allow removal of extra wheels, thus eliminating up to 4 pounds.
- ◊ Hooks over rails when not in use.

SKI MOUNT ICE SCRATCHER KITS

PART #	DESCRIPTION
OTT4000	RAIL MOUNT ICE SCRATCHERS

These are based on the same design as our OTT1000 rail mount reversible units but with a different bend profile. The ski is a 316 Stainless steel. They will mount through the spindle using a supplied M10 bolt. Also included is the standard hardware in case someone wants to mount them to the plastic on the ski.

REVERSABLE ICE SCRATCHER KITS

PART #	DESCRIPTION
OTT2000	REVERSIBLE CE SCRATCHER

- ◊ Twice the spray of traditional scratchers
- ◊ Durable scratcher/ski made of 316 stainless steel
- ◊ Scratcher/ski rotates to allow reverse operation
- ◊ Forward Position
- ◊ Reverse Position
- ◊ Up Position
- ◊ Reversible Ski/Scratcher

FLEXIBLE ICE SCRATCHER KITS

PART #	DESCRIPTION
ACS-ICE-02	ICE SCRATCHER CABLE TYPE

The ACS Flexible Ice Scratcher is cutting edge with a design that allows the snowmobiler to reverse without snapping it. It has a replaceable carbide tip. It is easily bolted on and combines superb durability and universal fit for a great value.

- ◊ Reversible - made from an aggregate polymer RMDS material that is both incredibly strong and extremely flexible allowing you to go forward or in reverse. No more breaking your scratchers.
- ◊ Replaceable Tips - allows you to easily replace your Ice Scratchers' tips at a minimum cost.
- ◊ Universal - Quick and easy installation on virtually any snowmobile.
